Packaging/Specification Management

Ensuring Your Packaging/Specification Management Needs

The ensur Packaging/Specification Management (PSM) solution brings together your various departments in a secure controlled collaborative environment. Regardless of where your departments and employees are located, ensurPSM's global access will keep your projects and specifications current. You will be able to track, edit, approve, and train your employees on the latest specifications and requirements with ensurPSM from concept to market. The application and workstation independence of ensurPSM integrates your departments like Art, R&D, and packaging into one repository.

The security features of ensurPSM captures all the actions taken upon your specifications in a comprehensive log and allows you to select who has access to them. Electronic signatures are an integral part of ensurPSM enabling final sign-off authority for your specifications.

EnsurPSM can be configured to use custom developed templates to coordinate all the relevant files and information in one location.

Included in ensurPSM is a change control process (ensurChange) that keeps revisions and changes in a more formal process.

ensurPSM precision

- Unlimited File Types Secured
- Collaboration Between Departments, Suppliers, and Distributors
- Unlimited File Attachment and Linking to Specifications
- Version Control
- Automated Workflow and Notification

“Ensur helped us reduce department inefficiencies by 40%, resulting in a reduction in our packaging development cycle from weeks to hours. What has made it a success is Mystic's great staff!”

George Engel
Director of Packaging
Major Consumer Products Manufacturer
