Training Management Solution

Ensuring a Trained Competitive Workforce for Tomorrow's Challenges

ISO, cGMP, FDA, and SQF regulations command you to have an up-to-date trained workforce. Your marketplace dictates that your employees' skills are appropriate for today's competitive environment. Your bottom line will not allow you and your employees to fall behind.

Ensur, the web-based off-the-shelf application, and the ensur Training Management Solution (TMS) will keep your workforce trained and maintain your competitive edge. You will be able to automatically schedule training, analyze training gaps, and have the evidence that your workforce is current and highly skilled with ensurTMS.

Ensur's global access and ease of use allows timely delivery of training to your employees anytime, anywhere.

ensurTMS Features Keep Class in Session:

- Training packages for building curriculum.
- Adjustable lifecycle to make sure only the appropriate courses are delivered when needed or scheduled.
- Security model that controls individual access to online registration, employee assessments, and training records.
- Ability to search event and sessions, track employee training records, conduct analysis, and generate reports.
- Maintenance of training records, attendance records, assessments, and observations.
- Linking across the entire ensur system.
